Work Experience

Software Engineer @ Nice Actimize

3.5 Years

Working as a PS professional services engineer. Worked on AML, IFM, Premier based solutions. Built automated solution for simplifying PS validation task to improve efficiency.

Intern @ Neeti Solutions Pvt Ltd, Pune

1 Month

The project involved learning about Django which is a web framework for Python and installing and configuring Open EDX which is an open source software. It enabled me to learn more about how websites are developed using the Django framework. The final objective was to configure the original source code to change site as per requirements. .

Projects

Document Management Using Deep Neural Network (DNN)

<https://project-abc.com>

Building and training a deep neural network (DNN) for learning to classify resume documents into predefined categories. Motivation behind the project is to reduce manual efforts needed by companies to read through large numbers of resumes to find viable candidates for a specific position. Building a sample GUI for uploading resumes which uses the DNN to transfer through email to the recruiter based on the category of the resume.

Event management System

<https://project-abc.com>

Mini project/Database application development on event management using Java and MySQL

Skills

Python

JS

Django

C++

Java

Mysql

Education

B.E Information Technology

Pune University

2015-2019

Passed with Distinction

S.S.C

New Life Centre

2003-2013

Passed with Distinction

Interest

Cricket

Travelling

Football

Sports

Cycling

Movies
